

Error Codes Sent to Vendors

No suitable buyers found.

At least one population for this outbound feed is setup as live or waterfall, and we are currently outside of processing schedule setup on the outbound feed.

Third-party rejection [Reason: Duplicate record] [Code: lxxx1]

If a third-party rejection code ends with a “1”, then we choked a waterfall or live population on our side.

Third-party rejection [Reason: xxxx] [Code: Oxxx0]

If a third-party rejection code ends with a “0”, then this was a waterfall or live population that was rejected by the client, and we are passing the rejection code from the client.

Feed id contains invalid characters

The vendor is sending a bad posting URL to us.

Invalid feed id

The vendor is sending a bad posting URL to us.

Unauthorized access.

The vendor specified the wrong posting URL password to us. (“pswd” parameter)

This feed has been disabled.
